What suggestions do you have to make the event better in the future?

I would remove the would you hire this person question. I thought that was not needed in a forum for student learning.

I think there should be a better plan to help students find their tables when they came in. I didn't interview like 4 kids and I don't know if they didn't show up or just couldn't find me.

The feedback form, like this survey is counter to the typical rating scale. On most surveys, the highest number is the best score. This created some confusion during the first couple of interviews for both the interviewer and interviewee. I recommend changing the scale to have "10" be the highest score.

It was a little unclear what we were supposed to do with the completed forms.

The student really seemed appreciative of the event, so perhaps it could be a bit longer so more students/schools could participate.

The "networking" time was a bit awkward. I had students come to network when I was supposed to be interviewing. I think students would benefit from doing two interviews rather than networking. More than half of the students scheduled, did not come for their interview. I am not sure if they were confused about where to be.

We had a lot of students not show up for their mock interview and interviewed some that were not on the list, not sure what happened. I think the networking did work that well. Most students were shy and didn't know what kind of questions to ask. I did love the mock interviews and most students did a great job!
